

Human Exposure Evaluation

Current Activities

- Fish Advisory
 - Addresses potential fish ingestion
 - Ongoing oversight by VADEQ/VDH
- Crop Study
 - Completed: Results consistent with literature
- Air Monitoring
 - Completed: Levels within background range

Human Exposure Evaluation

Exposure team (inc., VDH, VDEQ, USEPA, DuPont) to address other potential exposures

Exposure scenarios to be evaluated

- Direct contact with soils (including potential exposures via ingestion, inhalation, dermal)
- Potential dietary exposures
 - Domestic consumption, e.g., Beef, Poultry
 - Hunting consumption, e.g., waterfowl, small game
