

Advisory Panel Input

October 22, 2015

Questions Posed

- What are the strengths and weaknesses of the Phase 1 remedial design?
- Are there any critical data gaps or uncertainty concerning Phase 1 of the remedy?
- Are the key monitoring elements in place to measure success and inform the adaptive management process?
- How can we improve the adaptive management approach for the river remedy?
- In what areas is stakeholder acceptance at risk and how is this addressed?
- How can we reduce the potential for unintended adverse effects to the ecosystem?
- What data gaps need to be filled and what preparatory steps need to be taken to prepare the stage for actions beyond Phase 1?
