

Reasons Farmers Did It:

- 1st: Need for more water
- 2nd: Herd health
- 3rd: Eliminating calving risk areas
- 4th: Herd movement/grazing distribution
- 5th: Program assistance
- 6th: Conservation Ethic
- 7th: Fear of future regulation

“Clearly, at least 50% of all cattle diseases in the mid-Atlantic states are transmitted through the fecal oral pathway.”

- Dr. Scott Nordstrom, DVM
- It cannot be healthy to drink the same water you defecate in.

Upper South River Restoration

1. Break it down into smaller watersheds.
2. Hire personnel to build relationships with the landowners.
3. Long term, positive relationships work.
4. Market your science.
